DATA CENTERS

Data centers are an integral part of modern IT infrastructure. Equipped with advanced networking, computing and storage equipment, modern data centers are capable of handling huge volumes of data to and from storage endpoints, server nodes and network ports. In a cloud environment, hyper-scale data centers are critical resource hubs with massive computational horsepower and storage capacity designed to support a myriad of online applications and services. AZ offering data center solutions with a comprehensive portfolio of network, server and storage connectivity. From Ethernet switch, controller and PHY to custom ASIC, Fibre Channel SAN switch and HBA, SSD/HDD controller, NVMe/SAS/SATA/PCIe storage connectivity and optical transceiver components, AZ's highly differentiated and innovative solutions address the growing needs of modern data centers and empower the data-driven network.

SERVERS SOLUTIONS

As the backbone of your data center, having the right server architecture in place is crucial. Add to that the right server architecture will help you improve your business's productivity and performance.

AZ Servers Solutions will help you get the most out of your data center infrastructure. From blade to enterprise-class servers, we work with you to design, configure and implement the best server solution to run your most important business applications.

STORAGE SOLUTIONS

Data Storage Solutions are required to store the data electronically and making it machine readable. Purpose of these solutions is increases data storage accessibility, Availability, safety , Recoverability.

AZ Storage Solutions offers you the most competitive prices through many customized plans suite your needs.

INFRASTRUCTURE **SOLUTIONS**

AZ provides Core networking solutions, for small, medium-sized and enterprise companies. These solutions are based upon building the cabling systems and the core routing and switching network of the company, while providing resiliency, fault tolerance and flexibility for future expansion on the Local Area or Wide Area networks.

WIRELESS NETWORK SOLUTIONS

Wireless Network has become an indispensable part of our lives.

However, in real-life scenarios, we are seeing a lot of connection problems that can lead users dissatisfactions

AZ Wireless Network Solutions for home and office will let you experience the same high-quality, interference-free internet access you receive from a wired connection.

DESKTOP & NOTEBOOKS SOLUTIONS

One of the key tools used by any professional today is their personal computer system—a system that may range from a low-end PC to a high-end workstation, desktop or mobile.

AZ will help you to explore our range to find the ideal combination of power and price to suit your needs.

Desktop PCs, Notebooks, Ultrabooks, Tablets and Workstations all built with premium reliability, elegance, security and manageability.

While business PCs can provide you with excellent value, desktop workstations deliver superb performance, outstanding reliability, and wide-ranging scalability.

NETWORK SECURITY **SOLUTIONS**

AZ Provide Network security designed to protect the usability and integrity of your network and data. Effective network security manages access to the network. It targets a variety of threats and stops them from entering or spreading on your network

AZ Network Security Solution will providing a safe and reliable environment for your data communication.

INFORMATION SECURITY **SOLUTIONS**

AZ Information security solutions offer cybersecurity and cyber intelligence services and solutions that enable you to detect and defend your critical network infrastructure against cyberthreats like unauthorized access, use, disclosure, disruption, modification, perusal, inspection, recording or destruction ,and to establish long-term network stability and resilience

MANAGED BUSINESS SOLUTIONS

With today's complex environments, customers need to be prepared with a good mixture of both traditional and managed services – coverage from the plug in the wall to the cloud, and everything in between. With AZ's custom service level agreements and pay-per-use models, we ensure maximum system availability with minimal service disruption.

AZ focus is on enhancing the strategic value of our clients' investment in physical, virtual and cloud technology to yield the maximum return on that investment. We provide end-to-end services, from proactive monitoring and security to reactive support services and end of life asset disposition.

SECURITY SYSTEMS

From what no doubt it is very critical to have safe and reliable security system in your organisation. Today it became easy to take control of your own security

and can be accessible and monitored remotely at any location, at any time in the globe. AZ offers the best security services designed from the inside out to fulfill your needs, our equipment delivers high performance and reliability with the latest innovations and industry leading technologies.

We are accredited installers for the highest quality, tested and reliable products from the best international security systems suppliers. We have selected brands with a technology that allows our clients to monitor their sites from smart phones, tablets and TV at a remote location.

We offer high quality security services/products from well-known brands at competitive prices. Our confidence in the products we utilize allows us to give our clients 2 year warranty, and free maintenance and service for a year.

VOIP SOLUTIONS

Voice over Internet Protocol (VoIP) is the transmission of phone calls over the Internet instead of using traditional telephone landlines that can then be sent across your Local Area Network (LAN) or Wide Area Network (WAN) using the Internet Protocol (IP). This means VoIP phone services can be accessed from your computer, on your mobile device, or from a desk phone.

Simply put, VoIP enables you to make a phone call in much the same way as you would send an email.

VoIP enables businesses to Reduce and consolidate IT infrastructure , Eliminate the need for traditional phone lines , Save as much as 60-70% on phone bills AZ delivers the most effective and cost-efficient especially customized for your business needs.

SPARE PARTS

AZ provide wide range of original laptop spare parts & Accessories like Battery, AC Adapter, Keyboard, LCD Screen, LED Screen, DVD/RW, Inverters, Display Cable, CPU Fan with Heatsink, Hinges, LCD Back Cover / Rear Case, LCD Frame / Bezel, Touchpad, CPU Fan, Motherboard, etc.
